

Project reference: Aberystwyth Train Station

Aberystwyth is the terminus station of the Cambrian Line on the west coast of Wales, it was one of five Welsh stations to undergo improvement under the National Station Improvement Programme (NSIP+).

The overall project at Aberystwyth included the complete refurbishment of the station building and platform canopies, as well as provision of a new ticket office, remodelling of the station entrance, new statement entrance canopy, improvements to the car park and new public realm works.

Centregreat M&E was appointed as the main Mechanical & Electrical contractor by Alun Griffiths. A key challenge was to carry out the work in a way which allowed the station to remain fully operational, while minimising disruption and inconvenience for passengers and staff.

Centregreat's key activities comprised the installation of:

- New LED lighting
- A galvanised containment
- Small power
- LV distribution
- Data and communication
- Installation of mechanical services

Client: Alun Griffiths

Value: circa £450,000

Delivery Period: August 2014
