

## Project reference: Reading Care Depot M&E

The extension and upgrade to First Great Western's flagship Train Care Depot in Reading was part of the Department for Transport's Intercity Express Programme; to accommodate the new fleet of trains bound for the Great Western Main Line.

Centregreat Mechanical & Electrical were contracted by Spencer Group to install all mechanical and electrical services to the depot's new wheel lathe building. The scheme was delivered as a design & build contract and included HV enabling works and the installation of:

- LV distribution system
- LED Holo control lighting system
- Small power
- New galvanised containment
- A fire alarm system
- Data and communication systems
- Hot and cold water services
- A ventilation system
- A radiant heating system
- Underfloor heating
- Air conditioning
- Gas services

Client: Spencer Group

Value: circa £750k

Delivery Period: June 2016 - May 2017
